

Singapore ECO company 127 PCS Pneumatic V-type regulating ball valve

Geko flow control technology(Changzhou)co.,Ltd
complished and consigned the
pneumatic V-type regulating ball
valves to Singapore ECO
company,they are applied in the
project:300t/d mixed salt solution
(sodium sulfate, sodium chloride)
four effects,50t/d mixed salt solution
(potassium sulfate)three effects.。

The Approximate equal percentage flow characteristics of pneumatic V-type regulating ball valve, is suitable for adjusting the flow of materials, water, steam. It is the core part of the multi-effect evaporative crystallization equipments. Valves design, manufacture and testing is in accordance with EN12516-1、EN12266-1, smart positioner is intrinsic safety explosion-proof type, which are manufactured from Geko Taiwan and Geko Korean factory.

The reason why Singapore ECO chose GÉKO:

Geko Singapore office is responsible for installation, debugging,
training, after-sale service
Products long life, stabilization and reliable
High manufacturing standard, QA/QC system
Riched application experience in field of evaporative crystallization

Geko offered:

11PCS pneumatic fluorine lined V-type regulating ball valve GK050DA-GKV225V-DN25-GK2300RDiF00G0-GK55
10PCS pneumatic fluorine lined V-type regulating ball valve GK075DA-GKV225V-DN32-GK2300RDiF00G0-GK55
17PCS pneumatic fluorine lined V-type regulating ball valve GK110DA-GKV225V-DN40-GK2300RDiF00G0-GK55
7PCS pneumatic fluorine lined V-type regulating ball valve GK160DA-GKV225V-DN50-GK2300RDiF00G0-GK55
4PCS pneumatic fluorine lined V-type regulating ball valve GK435DA-GKV225V-DN100-GK2300RDiF00G0-GK55

19PCS pneumatic V-type regulating ball valve GK035DA-GKV225V-DN25-GK2300RDiF00G0-GK55
13PCS pneumatic V-type regulating ball valve GK035DA-GKV225V-DN32-GK2300RDiF00G0-GK55
21PCS pneumatic V-type regulating ball valve GK050DA-GKV225V-DN40-GK2300RDiF00G0-GK55
13PCS pneumatic V-type regulating ball valve GK075DA-GKV225V-DN50-GK2300RDiF00G0-GK55
8PCS pneumatic V-type regulating ball valve GK255DA-GKV225V-DN100-GK2300RDiF00G0-GK55
4PCS pneumatic V-type regulating ball valve GK435DA-GKV225V-DN150-GK2300RDiF00G0-GK55

Geko is professional working in flow and pressure control of special working condition, experienced and has already much experience in many industries.

Geko has the advanced technology, enriched experience, rational design, excellent performance, design, engineering, mechanical engineering, process engineering, finite element analysis, manufacturing, QA/QC and document control.

Geko design meets the requirements of:

ISO-EN-ANSI-ASTM-ASME-API-BSI-DIN-MSS-SSPC-FCI-ISA-NACE -AWS-AWWA-JIS-KS

Geko is in accordance with the ISO 9001 & API Quality system in designing, purchasing, produce managing and clients serving.
